

Purchase and delivery

01 • Review the product

Open the Thunder Circus preview on the product page. Try the award scenes from the right panel. Review the price, package contents and license terms attached to the order.

02 • Complete checkout

Confirm your order at the seller’s checkout. Once payment is verified, use the download button on your order page. Keep your order ID.

03 • Download and extract

Download Thunder_Circus_Package.zip and extract it to one folder. If the link expires, request a new link from your order page or contact the seller.

04 • Play now

Double-click offline/Thunder_Circus_player.html. Use Thunder_Circus_demo.html in the same folder to preview individual award scenes. Background audio is on at first load. Audio starts after the first click.

Setup and verification

01 • Local test or website setup

Upload the whole web/ directory with its relative paths. Open index.html for the preview or player.html for the player edition. For local testing, run “python3 -m http.server 8000 --directory web” from the release directory and open localhost:8000.

02 • Settings and controls

The right panel contains bet, SPIN, AUTO, BGM, speed arrows, INFO and fullscreen. AUTO plays 10, 25, 50, 100 or unlimited spins at the chosen speed; AUTO or SPIN stops it. INFO shows symbol pays and all 40 lines; BGM controls only the music.

03 • Fixed awards

GRAND 756,588 TC, MAJOR 174,250 TC, THUNDER STRIKE 28,540 TC and STAGGERED STRIKE 9,765 TC. MAJOR needs one symbol. Each other award needs its own symbol on three distinct reels. Regular line wins scale with the bet.

04 • Seller delivery workflow

Verify payment server-side and attach download entitlement to the order. Keep the ZIP private and issue an expiring link to the authorized buyer. See HANDOFF.md in the Claude Code package for steps and test cases.

05 • Before publishing

This browser release uses virtual TC. Payment, account and central balance integrations are separate. Verify the usage rights, support terms and end-to-end test purchase before publishing.
